☎ 9307923973 📍 pune, india

Professional Summary

Skilled Flutter Developer with 1.5 years of experience in building robust, scalable, and visually appealing cross-platform applications for Android, iOS, Web, and macOS. Specialized in Riverpod state management, REST API integration, Firebase services, CI/CD automation, and responsive UI design. Known for delivering clean, maintainable code, performance-optimized interfaces, and seamless third-party integrations. Proven ability to collaborate across design, backend, and QA teams to bring high-impact apps to production.

Skills

- Languages & Frameworks: Dart, Flutter, Riverpod, Python, Javascript, html, css
- State management: Riverpod, Provider, Bloc
- Integrations: RESTful APIs, WebSockets, Firebase (Auth, Firestore, FCM, Hosting)
- DevOps: GitHub, CI/CD Pipelines
- UI/UX: Figma to Flutter, Responsive Design, Custom Animations
- Utilities: Google Maps, Geolocation, Dynamic Links
- Soft Skills: Analytical thinking, Communication, Teamwork, Debugging

Education

- Master of Science in Computer Science (2025-2027)
- MIT Arts Commerce and Science, Alandi
- Bachelor of Science in Computer Science
- Savitribai Phule Pune University

Work Experience

Flutter Developer – Pune Lok News and Entertainment

Onsite | pune, India

- Developed and maintained Flutter applications with clean architecture, responsive UI, and reusable widgets for Android and iOS platforms.
- Integrated Firebase Authentication, Firestore, Push Notifications, and REST APIs to deliver secure and scalable mobile solutions.
- Utilized state management solutions such as Provider and Bloc to build maintainable and efficient application architectures.
- Optimized app performance, fixed bugs, and supported production releases, contributing to stable and high-quality mobile applications.

Flutter Developer – Antcreatives

Remote | Noida, India

- Developed a Flutter mobile application during internship, integrating Firebase Authentication, Google Sign-In, and Hive local storage
- Collaborated with the team to enhance features such as push notifications and secure login, improving app performance
- Collaborated with designers and QA to ensure performance and accessibility compliance

Apps:

[Wordgate](#): Mobile Word Game

[Cric76](#) – Cricket Matches Analysis

Flutter Developer Intern – Codeaamy

pune,India

- Developed and maintained cross-platform mobile applications using Flutter and Dart, ensuring responsive UI across Android and iOS
- Integrated Firebase Authentication, Google Sign-In, and REST APIs to enable secure login and real-time data handling.
- Gained practical knowledge of the mobile app development lifecycle,including deployment, debugging, and version control (Git/GitHub)

Languages

- English – Professional Proficiency
 - Hindi – Native Fluency
 - Marathi – Native Fluency
